

Max Geurts

Game/Software Developer

About me

My name is Max Geurts.
I live in Blaricum,
and I do software development
in my free time and for work.
I'm fluent in both English
and Nederlands.
I started getting an interest in
software development when I was
14 years old. Back then, it was
mainly game development that I
was interested in, but that kept
expanding into an interest in
development as a whole.
That is why, during my studies
at GLU (Grafisch Lyceum Utrecht),
I decided to do my internship at
a software/web development
company named Xeropex.
After my first internship period, I
worked there during the summer
vacation and stayed around for
my second internship period.
I then even started working there
after finsihing school.

Studies

Mavo : 2018-2022
Grafisch lyceum utrecht, game development: 2022-2026

Stage periods

Xeropex: Fabruary - June 2025
Xeropex: October 2025 - January 2026

Werk Ervaring

Hema: July 2024 - March 2025
Xeropex: Vacation 2025
Xeropex Parttime: Fabruary -July 2026
Xeropex project: September 2026

Xeropex

At Xeropex, I primarily worked on large internal projects, such as an automated system for sending vacatures that also had to handle refunds and late payments. I also worked on bug fixes and feature additions for customers on the side.

Hema

At Hema, I worked in the food section.
I interacted with customers to take orders and worked with my coworkers to plan who would do what each day, as the tasks were never planned beforehand.

Max Geurts

Game/Software Developer

Hard Skills

- C#
- Unity
- Unreal Engine
- PHP
- Fluent in Dutch and English
- GitHub
- Perforce
- Laravel
- PhpStorm

Soft Skills

- Team worker
